

Standard C-Arm Drape

Ideal for cases where only the region above the table needs to be draped, CFI's Standard C-Arm drape is designed to cover the Image Intensifier and half-way down the C-Arm. The drape has been engineered to fit nearly all C-Arm designs including OEC, Siemens & Philips. The Standard C-Arm drape includes 3 adhesive strips that can be wrapped around the C-Arm to collect excess poly, and a rubber band to pull the poly tight around the I.I.
